

CBAMValid Structure Review Brief

Reviewed for structure — not a verification opinion

This brief describes the sealed Preparation Pack fields and evidence lineage that CBAMValid asks independent verification bodies to assess for workflow fitness under IR 2025/2621. It is not a verification opinion, reasonable assurance, accreditation endorsement, EU approval, or customs decision.

Package fields in scope

1. Operator / installation / reporting-year scope boundary
2. CN classification, goods quantities, sector, allocation shares
3. Embedded-emissions calculation with deterministic trace nodes
4. Evidence register with SHA-256 and field-to-evidence links
5. Fail-closed quality controls and open findings visibility
6. Integrity manifest: file hashes, ruleset pin, engine version, seal time

Target one-page letter language

We reviewed the CBAMValid Preparation Pack structure. It contains the data fields and evidence lineage required under IR 2025/2621 for our verification workflow. This is a structural review, not a verification opinion.
